FOREWORD

The native geographer has come and gone in New England; as is true of so many aboriginal inhabitants, his was a light touch which left little impress upon the land. Because the White emigrant to the region had little understanding of the various local dialects, and even less interest in native cultures, by and large the names the Indian gave to his landmarks have disappeared. Many of these have survived in extremely distorted forms, and only a small proportion of the currently-used place names are clearly defined and readily translatable Indian terms. This is an unfortunate loss to our historic heritage.

As part of a continuing interest in the preservation of information related to all aspects of Amerindian life, this volume is published in an attempt to bring together as large a body of data as possible relating to the toponymy of New England.

The compiler, John C. Huden, has been active in the study of the early Indian history of New England for the past forty years. He is familiar with several Algonquian dialects, and has spent many years of intensive research into the particular field of place names. From these researches has come an extended record of publications on the subject. Currently on the faculty of the University of Vermont, Dr. Huden has a background of first-hand acquaintance with the region and its aboriginal inhabitants.

It is confidently anticipated that this compilation will prove useful to the reader who is interested in the Indian background of New England. It is also hoped that it will encourage the publication of other studies of a similar nature, so that in due course, the Indian place name structure of the entire United States will be available in published form. While there are many titles in the literature on the subject, much is yet to be done.

The Museum is particularly grateful to Dr. Huden for his untiring efforts in gathering together this information before it is entirely lost, and also to Mr. Lawrence K. Gahan for the generous loan of his notes pertaining to the Massachusetts area.

PREFACE

Many years ago, J. Hammond Trumbull remarked that, "translating of [Indian] names in Southern New England is far more difficult than in "new" states [Michigan, Minnesota, etc.] where Algonkian is not a dead language. Half the Indian names in Rhode Island are so corrupt as to defy analysis!" (Trumbull, 1912, p.68).

This declaration can be applied as arbitrarily to all of New England. Many place names included in this, and other compilations, continue to resist satisfactory translation. Native languages were very difficult for New England colonists, most of whom were not the best of penmen—nor, in many cases, even masters of English usage. Many Indian locatives were first heard from terrified, unwilling lips by prejudiced Puritans—circumstances hardly conducive to linguistic clarity! It is not surprising, then, that a colonist who spelled his own name six or eight different ways would employ a half-dozen variant spellings of a Wampanoag term in a single document.

Even educated English officials had trouble with dialectal differences between such closely-related tongues as Wampanoag, Natick, and Narragansett. Ministers who had studied Latin and Greek found considerable difficulty when they tried to force Algonquian phrases into classical moulds. Some early students attempted to reinforce a then-current belief that the Amerindians were the Ten Lost Tribes of Israel by applying Hebrew grammar to Algonquian constructions; Old Testament cosmology was compared with Indian beliefs, which only compounded the confusion. In addition, many Indian customs and religious ceremonies were suppressed as pagan, and unchristian; the result was an inevitable spotty rendition. It is from just such unsatisfactory bases that the present compilation has arisen.

HISTORICAL BACKGROUND

It is not the function of this work to set forth anything more than a very brief review of New England Algonquian history. For the purpose of orientation, it must suffice to say that, beginning with the arrival of the earliest Europeans, Algonquian-speaking peoples of the region were continually being mauled,

expelled, exhorted, acculturated or killed. By the end of the American Revolution, only a pitiful remnant lingered in Connecticut, Rhode Island and Massachusetts, most of whom could speak their aboriginal languages imperfectly, if at all. By 1825 the Algonquian languages of Southern New England were practically dead. The last fluent speaker of Wampanoag died around 1827, by which time Narragansett had already followed Nauset, Nipmuck and Pennacook into oblivion. By a strange set of circumstances, Mohegan survived until the death of Mrs. Fidelia Fielding in 1908 (Speck, 1928, pp. 223-225).

Thus, in three hundred years from the Pilgrim landing at Plymouth Rock, the Wampanoag, Natick, Nipmuck, Narragansett, Pequot, Mohegan, Wappinger, Mahican, Pocumtuck and Pennacook tongues had all disappeared, leaving only an assortment of poorly-transcribed and ill-understood place names as their monuments.

In the North, Abnaki, Malecite and Micmac still survive. Fewer than 2,000 Maine Indians, mostly mixed bloods, today use dialects derived from their ancient language.

POPULATION ESTIMATES

Swanton (1952) indicates that in 1600 there were from 25,000 to 30,000 Algonquians in New England, speaking upwards of 20 dialects. The 1960 U. S. Census presents official figures totaling some 6,084 New England "Indians," most of whom are mixed bloods. It is therefore obvious that from 1600 to 1960, New England lost about eighty percent of its Indian population, together with ninety percent of their native languages.

Although there are no accurate population statistics available—the colonists rarely made fine distinctions between the various tribes—the following estimates have been compiled by James Mooney (1928). This classic study, based upon painstaking evaluation of all of the historical material available, remains the most reliable compilation we have to date.

NEW ENGLAND ALGONQUIAN POPULATION IN 1600

Abnaki	3,000	Pennacook	2,000
Eastern Niantic	400	Pequot	2,200
Mahican	3,000	Pocumtuc	1,200
Mohegan	2,200	Wampanoag	2,400
Narragansett	4,000	Wappinger	1,750
Natick	1,200	Western Niantic	600
Nipmuck	500	TOTAL	27,450

Authorities agree that this total would represent the minimum, rather than maximum, number. It should also be noted for the purposes of this volume that these figures do not include such non-New England peoples as the Micmac, Malecite, or Delaware, nor the Iroquoian tribes of neighboring New York.

The contemporary population figures of the New England region are of interest, but it must be emphasized that the vast majority are not full-blooded Indians. As a matter of objectivity, it is doubtful whether more than a handful of full-blood Indians remain in New England today, and these latter would be concentrated in upstate Maine.

INDIAN POPULATION OF NEW ENGLAND
 ACCORDING TO 1960 CENSUS

Connecticut	923	New Hampshire	135
Maine	1,879	Rhode Island	932
Massachusetts	2,118	Vermont	97

LINGUISTIC AIDS

Over these three hundred years, satisfactory dictionaries have been compiled for only three of the languages concerned, namely Abnaki, Narragansett and Natick. Although many students have devoted their interest to the languages of the American native, very few have been willing to spend the necessary time to organize that initial tool of linguistic study; rather, they have concerned themselves with grammatical and comparative studies, often failing to establish basic vocabularies for use in continuing research by others.

ALIEN TONGUES INVOLVED

Most of the non-Algonquian names found in New England are Iroquoian, notably Mohawk. There are several historical and archeological evidences of Mohawk occupation in the extreme northwestern portion of New England, particularly the Champlain Valley of Vermont.

Practically all of the Mohawk place names in Vermont included herein have been taken from French and English maps dated before 1790; the rest have been gleaned from old documents of many varieties. These Mohawk names were submitted to Charles A. Cooke, *Thawenensere*, for examination and comment just prior to his death in 1958. His tentative translations were sent to Dr. Floyd G. Lounsbury for checking (*see* Lounsbury, 1960.)

Cooke was born on a reservation at Lake of Two Mountains, Québec, on March 12, 1870. He spoke only Mohawk until he was twelve, and as a child he made many trips with relatives throughout the Albany-Montréal-Richelieu-Champlain corridor areas. He recognized all of the names submitted to him, and suggested many more. Lounsbury (1960, p. 58) makes this interesting observation on Cooke's efforts: "Mr. Cooke may have been translating the European names back into Mohawk in these and in other cases where an original Mohawk name was not historically documented." This may well be—but it would have perhaps been fairer to say that either Huden did not understand Cooke clearly, or else that Cooke, bedridden and able to work only a few hours a day in his last years, did not have the energy to supply anything more than the barest requirements of the task.

THE APPROACH TO THE PROBLEM

This is not an original work. It represents a compilation of New England place names of Indian origin, assembled from maps, globes, charts, novels, poems, diaries, conversations with informants, and obviously the material in previous compilations. These latter sources are listed in the appended bibliography. It is organized to give the simplest basic information, rather than extended linguistic analyses; to have done the latter would have required another several years preparation, and it was felt better to proceed with the material presently in hand, and assure the publication of those data, which represent the concentrated efforts of the past decade.

The form used throughout this listing presents the Indian place names in boldface type, using the most-commonly-seen spelling; this is followed by any secondary term, in lightface (such as Lake, River, Pond, etc.); then the location is given by county and state for all place names included. When followed by ?, this indicates that the place name has been found in early documents, but that its actual location is not known for certain today. The dialect or language is indicated in italics; if doubtful, that doubt is shown by ?. Suggested translation of the name, and any comments are then given, followed by variant spellings or cross-references, the latter in boldface. Thus all actual place names are in boldface, linguistic terms are in italics, and the balance is in lightface type throughout the listing.

Selection of the names to be included has been primarily based on the occurrence of names on historic or quadrangle maps, their appearance in a historical document, or in any generally-accepted work of literature. In several instances, informants have supplied almost-forgotten "undocumented" items. Those which are Indian translations of names invented by whites (e. g., *Majihondopemab-tunk*, "Devil's Foot Prints," a Penobscot translation of such a white-invented term), or pseudo-Indian names (such as "Smile of the Great Spirit," "Indian Lovers' Leap," etc.), have not been included. Some terms which refer simply to Amerindian folklore, but which are not truly *place names* have been omitted, such as *Moshop*, *Nodumkanwet*, and *Squant*—references to mythological creatures, sometimes confused with locatives.

Many Indian names are preserved in four, five, or, as in the case of Winnepesaukee (see pages 6-7), as many as one hundred forms. In this work, only the major variants are included; extreme cases of linguistic diversity are not used, simply due to lack of space.

ACKNOWLEDGMENTS

Any compilation of place names depends upon the work of many people; this volume has drawn from the contributions of others in even greater degree. Indian informants have been most helpful, particularly the following Abnaki friends:

Stephen Laurent, Intervale, New Hampshire
Robert-Elie Obumsawin, Odanak (*deceased*)
Urbain Obumwasin, Odanak
William Simon Obumwasin, Odanak (*deceased*)
Theofil Panadis, Odanak
John Wadso, Odanak (*deceased*)
Alice Masta Wawanolett, Odanak
Oliver Wawanolett, Odanak (*deceased*)

The contributions of Mr. Charles Cooke have been mentioned, as have the appreciated comments of Dr. Floyd Lounsbury, Yale University.

Rev. Thomas M. Charland, O. P., Montréal, and Mr. Herbert E. Putnam, of the University of Vermont, have aided in matters relating to Canadian Affairs. The cartographic knowledge of Mr. Theodore E. Layng, of the Canadian National Archives, Ottawa, has proven of great assistance in locating map details.

Translations of certain European languages have been patiently provided by Messrs. Paul D. Evans, Malcolm D. Daggett, Brady B. Gilleland, John H. Kent, and James E. Pooley, all of the University of Vermont; and Mrs. Grace B. Huden, of Burlington, Vermont.

The use of documentary material, together with helpful references to many others, has been facilitated by Mr. Harrison A. Brann, Bailey Library, University of Vermont; Miss Virginia A. Knox, Connecticut State Library, Hartford; and Mr. L. Felix Ranlett, Librarian, Bangor, Maine.

Much of the assistance rendered in Massachusetts area place names was unselfishly furnished by Mr. Lawrence K. Gahan, who placed his notes and other material at our disposal. In the early stages of this manuscript, Mr. E. K. Burnett, then Director of the Museum of the American Indian, offered considerable encouragement and wise counsel.

There are many others, too numerous to mention, who have been helpful in this task; but none contributed more in the direct and back-breaking labors of typing, editing and proofreading than Mrs. Nancy S. Abell, and Mrs. Grace B. Huden, both of Burlington. Without these two aides, this volume would truly have never come into being. To all of the foregoing, and to the patience and direction of Dr. Frederick J. Dockstader, I am sincerely grateful.

INTRODUCTION

In Dunlap and Weslager (1950, p. viii), the late Frank G. Speck commented, "Interpreting some of these Indian place names *recorded by early white scribes who knew nothing about Indian tongues* is like trying to juggle sand." [Italics mine—JCH]. This volume will amply demonstrate the truth of that observation. While many of the place names herein listed can be readily translated into English, some completely defy analysis, and a few cause the would-be interpreter to doubt whether they be truly of Indian origin.

Relatively few aboriginal names have persisted in the northeast. For instance, only two of the six New England states—Connecticut and Massachusetts—have Indian names, as compared with at least twenty-four of the fifty United States at large. This general percentage carries on through all of the toponymy of the region. Most of the names used today are English in origin, although French has left its mark, as have a few other European tongues.

In some instances, original Amerindian names have been replaced by English names suggested by the original, viz.: **Mosketuauke**, Rhode Island, eventually became Mosquito Hawk, an obvious rendering of the fancied sound. Others, such as **Naumkeag**, now Salem, and **Sicaog**, now Hartford, were completely lost and replaced by English names with no references to the original.

Indian names are almost invariably common appellatives. New England Algonquian place names could be, and have been, plain words which appear throughout the region; in fact, Algonquian dialects were (and a few still are) used all along the Atlantic seaboard from Nova Scotia to Virginia. These dialects are sometimes very similar to each other, much as the English use of *honour* as compared with the American *honor*—or they may differ completely, as English *petrol* and American *gasoline*. The differences are usually noun localisms; grammar and general constructions normally parallel closely, and in all cases, the wider differences indicate long periods long of separation of the two dialects, either in time or in space.

New England Indians did not develop a naming system of the type more familiar today. Rarely did they use terms referring to

far-away places. Common terms were employed for places in their own neighborhood, as we do for sections within our own frequently-visited areas—farms, cities, towns, or counties. They renamed places and persons almost at will. Lacking writing, they were unable to consolidate these terms, thus no gazetteer developed to firmly establish a given form.

Historically speaking, many Indian place names did not linger very long. Since 1600 the Connecticut River has been known variously as **Counnitegou**, ("Long River"), **Manigana tica uoit** ("Mahican's River"), **Sicojocke** ("Mud People"?), and **Sokoquois** ("South People's River"), etc.; the Mahican, Sicojocke and Sokoki are gone, their names all but forgotten—but Connecticut, the Long River, is still there. Similarly, Lake Champlain has been **Petow-pargow** or **Peton-bowk** (the "double pond," or "pond between") to the Algonquian peoples, and **Caniadieri Garont** ("lake with a bulge") to Iroquoian-speaking Indians. **Massachusetts**, "place of the big hills," (the Blue Hills near Boston), and the name of the major tribe in that region, now officially indicates the whole state area.

The usual references to color, vegetation, flora and fauna, natural phenomena and the like, are to be found throughout the toponymy of New England, and in this category, little difference is to be discerned from place name practices in other parts of the United States—with perhaps only a slightly greater degree of emphasis upon water-usages (pond, lake, river, etc.).

Designations of tribes, mythological characters, and long-discarded processes or implements are to be found. Hundreds of personal names of important personages are recorded; most are at best only approximated in translation, for meanings of a majority of these are lost, while many have been suppressed by early writers as being pagan, ridiculous, or obscene. These proper nouns give great difficulty, for often they are further distorted by attempts to Anglicize not only the *form* of the name, but often its *meaning*—a process almost guaranteed to entirely obliterate any resemblance to the original! Furthermore, many Indians were known by more than one name, which only increases the confusion; Massasoit, "the great commander," was also known as Osamequin, "yellow feather." Such dual usages were quite common.

But perhaps the simplest cause for error arose from the basic inability of either side to communicate. When the colonial White asked the Indian the name of a given place, the latter often replied

by giving his own personal name, thinking this was what was requested. And out of just such simple misunderstandings have come many of the place names of the nation.

PRONUNCIATION

Completely aside from the matter of translating Indian place names is the question of their actual sound as spoken by natives. It has already been remarked that a majority of the colonists were barely fluent in English, and thus could hardly be expected to handle such alien tongues as Abnaki, Narragansett or Pequot with ease. Moreover, the unfamiliar sounds could give completely different meanings if even slightly mispronounced. Therefore, the first emigrants into the New England region found themselves in linguistic trouble almost immediately upon landing.

The lack of written gazetteers, together with the very few dictionaries or other written records, makes the problem extremely difficult. So it is that the matter of indicating correct pronunciation amounts to a practical impossibility today. Such linguistic studies as have been compiled to date show all too clearly how difficult is this matter of accurate sound. Laurent (1884), for example, gives three pages of extremely detailed directions for pronouncing Abnaki. Even such standard references as *The Columbia Lippincott Gazetteer of the World*, and *The Encyclopedia Americana* give varying renderings of similar terms, apparently based primarily upon local usage.

Many of the more commonly-used Indian terms have come to enjoy what may be called a "standard" pronunciation, and this is usually found in the larger dictionaries. Yet it must be emphasized that at this late date there cannot be anything like a "correct" pronunciation of most of these terms. For this reason, this work avoids almost entirely the matter of syllabication and pronunciation. Just as in English the sound *bār* in various contexts will indicate "to bear," meaning to carry or support; "bare," indicating clear, treeless, or nude; or "bear," referring to an animal, just so are there homonyms in Indian tongues which require context for reasonable interpretations.

Saugatuck has been uttered as *Saw'gatuck*, *Sawgat'uck*, *Sawgatuck'* and *Soggertick*—all referring to the same place. In the *Natick Dictionary* (Trumbull, 1901, p. ix), Edward Everett Hale wrote, "with good sense, Eliot used the English [alphabet] letters with the sounds which Englishmen gave them," and, "In Sherman's

translations, Latin vowel sounds were used, so Eliot's *wadchu* (mountain) appeared as *uijuui*."

As a youth, this compiler knew some of the last Montauk and Mohegan speakers. Wyandank Pharaoh, a Montauk, used to say *Zzungee!* (it's cold!), but Mrs. Nonesuch, a Mohegan, would exclaim, *Ssonkee!* None of these old people could construct whole sentences, but they had quite a store of nouns, such as *torup* ("snapping turtle"), *pootap* ("whale"), *nitop* ("friend"), etc. They could, and did, use parts of the Lord's Prayer (Speck, 1928, p. 251), and a simple grace before meals; apparently these passages came to them word-of-mouth from great-grandparents who "fit in the Revolution."

We have tried to determine contexts, and the translations in this work reflect contexts wherever found. An attempt has been made to furnish generally-accepted spellings, relying primarily upon that form most commonly used in the region involved. Variants are essentially those which seem to represent secondary usage.

Unfortunately, it is impossible to establish any "guide to pronunciation" which would be consistently helpful for the terms in this volume. Not only have the forms undergone the extreme changes mentioned previously in this section, but there were as many exceptions to the rules of pronunciation in Algonquian as exist in English. One can generalize, for instance, that in Maine, place names have no silent letters; that those letters usually have but one sound, which must be learned by imitation; and that the stress varies in a given word, but normally the strongest accents fall towards the ends of words. Yet an examination of some Maine place names immediately reveals some of the hazards in trying to establish rules:

1. Monosyllables are few, but are usually pronounced as spelled.

Example: **Quack**.

2. Names with two syllables usually stress the first:

Apskek	Ap'skeck
Cobscook	Cob'skook
Essick	Ess'ick
Saco	Say'ko (<i>but also</i> Saw'ko, <i>and</i> Sack'o)
Winskeag	Wins'keeg

3. Polysyllabic names usually stress the second or third syllable, but this rule is not rigid:

Metinic	Me-tin'ick
Pemetic	Pem-e'tick
Pemskudek	Pem-skood'eck
Agawam	Ag'a-wam (<i>but also</i> Aga-wam')
Aquadoctan	Ak-wa-dock'tan
Matinicus	Ma-tin'e-kuss
Madahumuck	Ma-da-humm'uck
Pemjeedgewock	Pem-jeej'e-wock
Pemtegwatook	Pem-teg-wa'took

4. Names formed of many combined syllables break into several forms, and must be learned by practice:

Aguahassideck	A-gwa-hass'ee-deck
Alnambi kwaysah wayk	Al-nam'bi-kway-sa'wake
Talagodissek	Ta-la-go-dee'seck

The Southern New England language groupings follow somewhat similar rules, even to the matter of inconsistency, *viz*:

1. Words of one syllable are rare, and usually may be readily pronounced as spelled, *e. g.*, **Paug**.
2. Words of two or three syllables usually stress the first syllable:

Acquet	Ak'weet
Catumb	Cat'umb
Mystic	Mis'tick
Seipican	See'pi-kan
Sippican	Sip pi-kan
Wekopee	Week'o-pee

3. Polysyllabic words tend to stress the latter ends of words, although this is not rigid:

Connecticut	Co-nek'ti-kut
Wesquadomeset	Wes-kwa-dom'e-set
Poohookapaug	Poo-hook'a-pog
Mishimayagat	Mish'ee-may'a-gat
Nunkatusset	Nunk-a-tuss'et
Massanagtakwonah	Mass'a-nag-tak'wo-nah

In conclusion, this quotation from Speck may be of some pertinence. Speaking of Mohegan-Pequot, he wrote, "...no doubt the phonetic qualities of the dialect have been somewhat corrupted by a long period of contact with the English. . . . this dialect is phonetically uniform with other southern New England divisions except for the *y* distinction in the transposition of *r*, *l*, *n*, *y*. . . ." (Speck, 1928, p. 226).

To sum up: In the absence of standard reference works, about the only way to achieve a competent pronunciation for an Indian

place name in most of New England is to divide it into syllables representing Indian root-meanings and put the stress in the middle or toward the end of the word.

SPELLING

Reference has been made to the problems involved in the "proper" transcription of Indian terms. Fanny Hardy Eckstorm makes a cogent point concerning this matter in her comments on the lack of a fixed spelling. She points out the confusions between similar words, and asks,

How did Captain John Smith pronounce his Elizabethan English rendition of Indian words? . . . And if, in going further, we today try to explain Smith's Elizabethan-English-Indian forms, or we use the Gallicized Abnaki of Father Rasles, we only compound the difficulty. Our best authority of Modern Abnaki, Father O'Brien, veered inconsistently between English and French notation; unfortunately, he did not live to revise his work. Who shall say today how his words should be transcribed? *Yet upon the sound he meant may depend the grammatical root of the term in question.*" (Eckstorm, 1941, pp. xx, xxi. *Italics mine*-JCH)

As a simple demonstration of the other side of this coin, the following list is presented, which includes fifty variant spellings, all of the same place name, as found on various official documents. And it should be noted that this is a *selected* list—there are over fifty *more* variant spellings for this same body of water! Even so, who is to say which of these many forms is "correct," and which is "wrong"? At this late date, there can be no rule other than the arbitrary decision of most-common-usage, or the dictum of a quasi-official Geographic Board. And both of these authorities can as readily decide in favor of an accepted spelling which might be totally unintelligible to the original propounders of a given place name, were they to return to the scene today.

Wenapasicke	Winipisiocke	Winnepisoogee
Wenapesioche	Winipisioke	Winnepissk
Wenepesioca	Winipisioky	Winnepissocay
Wenepesiocho	Winipisokee	Winnepossockey
Wenepesiokee	Winisipisiokie	Winnipesse
Winassosawque	Winnapissaacka	Winnipiseoca
Winnepissackey	Winnapissiaukee	Winnipiseoce
Winepiscocheag	Winnapresseakit	Winnipiseokee
Winepiseoka	Winnapusseakit	Winnipisocy
Winepisokey	Winnapussykat	Winnipissacca
Winipasekek	Winnepesaukee	Winnipissiaikee
Winipisaro	Winnepeseochee	Winnipissioca

Winipiseocee	Winnepesocket	Winnipissiocky
Winipishoky	Winnepiseoge	Winnipissoake
Winipisiackit	Winnepiseokee	Winniposockett
Winipisiakit	Winnepisioco	Winnopisseag
Winipisinket	Winnepisiokee	Winnopusseag

To settle this vexing matter, the State of New Hampshire decreed that the “official” spelling shall be *Winnepesaukee*. Who can argue at this late date which is the most correct form?*

* Yet, even as this volume goes to press, a new “official state map” has just been published by New Hampshire, on which *Lake Winnepesaukee* appears(!).

TRANSLATING ALGONQUIAN PLACE NAMES

Here are some very general rules by which the reader may develop an understanding of the technique followed by the compiler in arriving at a meaning of many of the place names in this volume. While this is by no means a "do-it-yourself kit" for such translating, it is hoped that these suggestions may enable a student to achieve his own analysis of many Algonquian terms.

1. Seek the original or earliest available spelling of the name. This is important, for unless you can establish a fairly early form, your translation may go seriously awry.

- a. What dialect does it presumably represent?

- b. If the name contains a **v**, **f**, or the **ph** diphthong, it is probably miscopied; these sounds are absent, but can be easily mistaken in hearing Algonquian speakers.

Thus: *Maffachusetts* is patently **Massachusetts** spelled with the old-fashioned **j**, usually printed in more recent times as **f**. Another: *Foxon*, from **Poxon**.

- c. Remembering that **b** sometimes changes to **p**, that **d** may change to **t**, and that **l**, **n**, **r**, and **y** are interchangeable from one dialect to another, cast the place name into several forms.

Thus: **Bash Bish** from *pashpishau*, and **Bantam** from *Peantam*. Also, cognates, such as *nitap* and *nidoba*, are from Natick and Abnaki, respectively; both mean "friend."

- d. Bear in mind the historical shift of **r** to **l** in Abnaki. Words spelled with **r** in Old Abnaki are now customarily found with an **l** in Modern Abnaki.

2. Using Algonquian groupings, break the name into syllables. In this, you must seek the basic root, or root-word—a fundamental sound or group of sounds which convey an idea (usually some kind of action).

De Forest (1851, p. 41) explains the problem as follows: "[Indian language has] the power of uniting various syllables of different words, into one new word, which should express *all* of the original terms from which it was compounded. Thus

a *Delaware* (kindred dialect of the *Mahican*) girl in playing with a dog might give utterance to her pleasure by exclaiming *Kuligatschis*, that is, "thy pretty little paw." This word would be compounded from *K'*, "thy," *wulit*, "pretty," *witchgat*, "paw," and the diminutive, *schis*; so that four equally distinct and perfect words would be melted into another equally perfect, which would contain only part of their sounds, but the whole of their meanings." Thus, the *parts* of those sounds remaining were the *roots*.

The root word *seseċ* or *sisikw* (the root is actually *s-s-k*) conveys the idea of "rattling," as seeds rattling in a dry gourd; a ceremonial turtle-shell rattle; dry beans or pea pods; or a rattlesnake. Another, *-be-* or *-pe-*, is found in many words pertaining to "water," as *nebe*, or **Winnepesaukee**. The root *-tp-* is found in *antep*, or *ontop*, meaning "head." Also, *-tn-* and *-dn-* are roots for the inseparable *-adn-*, "mountain," as found in **Monadnock**.

Sometimes only the root appears in compound words, as Algonquian languages are highly agglutinated—that is, built up from other words, all telescoped into one. In Hampden, Maine, there used to be a high glacial sand bank (long since carried away for gravel), called **Tolbunthessek**, "turtle head," because of its shape. The word has this analysis: *tolbeh*, "turtle," *antep*, "head," plus the locative *-essek*. Hence, "turtle head place," or in more grammatical English, "at the place of the (sand bar resembling a) turtle head."

3. See if the syllables are root words similar to those in other analyzed names. A listing of such roots is helpful (for examples, pages 301–368 of this volume).

To analyze *Moskwastooxees*: look up a similar term, **Moskwaswagamok**, the meaning of which is given herein as "muskrat lake." Thus the first part of your word, *Moskwas*, probably means "muskrat." Your root list gives *tuck*, or *took*, as "river, driven by waves"; you also have *took-sees*, as "brook, or rivulet; diminutive." The name *Moskwastooxees*, then, probably means, "muskrat's little river," or, more grammatically, "muskrat creek."

4. Then, check this against context: could the meaning indeed refer to the place name? Does it make sense? If your term is attached, say, to a mountain peak, but seems to translate as a waterway (highly unlikely, but it does happen), then there has either been a loss of a syllable, or else the spelling has undergone a major change in the past. There is always the chance that the name was affixed to the locale by a white settler, in error. However, do not require too tight an application of this rule—let it suffice that the name makes

reasonable sense as an appellative. At this distance from the original source, you are working in a vast sea of uncertainty; it is easy to find yourself swamped!

In order to test the formula suggested above, here are a few examples of Algonquian terms, with their analyses:

Lake **Shoonkeek Moonkeek**, in Berkshire County, Mass. This was traditionally Mahican territory, but since there are no satisfactory Mahican vocabularies, the related Delaware (Brinton, 1888) was used. Confirmation was found in Tooker (1911), which includes many Delaware terms.

1. The oldest available spelling is **Shonkamonk**.
2. Dividing this into syllables, we get *shonk a monk*.
3. This is somewhat similar to **Ouschankamaug**, a Delaware term derived from *ousacheu*, "slippery," and *-amaug*, "fishing place." Also found is *schachamek*, "slippery things caught with a hook, i. e., "eel."

From this, we decide that **Shonkamonk** (and therefore **Shoonkeek Moonkeek**) means "eel fishing place."

4. This makes complete sense, since this lake (now called **Pontoosuc**) has indeed many eels. The *-eek* endings of this term are apparently humorous Anglicized additions.

Housatonic River, in Connecticut and Massachusetts:

1. The older available form is *Ousatonic*.
2. Divided into syllables: *ous-a-tan-uc*.
3. Apparently *ous* derives from Delaware *awossi*, "beyond, the other side, over;" *-atan-* is the inseparable form of "mountain;" *-uc* is a locative ending, "place of."
4. Hence, **Housatonic** means, "place beyond the mountain(s)." This makes complete sense, since Mohegan people said that they, as well as the river, came from "a place beyond the mountain." A variant form, **House of Tunnick**, is a poorly modified Anglicization of the original. (See also **Aswahdenick**, apparently an Abnaki cognate of **Housatonic**).

But a word of caution should be introduced here: it is usually unsatisfactory to try to unravel, say, Abnaki, by means of Natick root-words. Although there are many similarities shared by the two, (and other cognate tongues), generally speaking such an attempt is as risky as trying to use an Italian dictionary on French words. Your average will be about the same—you may get the general sense of the meaning, but almost never will you

achieve any precise translation, and you may get a completely wrong interpretation.

To make the problem more difficult, the same form may give considerable confusion unless the root words *as originally used by the Indian people* can be located. For example:

A. **Winnisquam** Camp, Chittenden County, Vermont. *Abnaki*, "at the top of the tree."

B. **Winnisquam** Lake, Belknap County, New Hampshire. *Abnaki*, "salmon fishing around here."

Note that these are the same word, same tongue, but have totally different meanings. The first entry derives from the original *wanaskiwi*, meaning, "end, end-place, top place, or summit." The suffix *-quam*, or *kwam*, is peculiarly Abnaki for "tree" in composite words. Hence, *wanaskiwi-quam* telescope into **Winnisquam**, meaning "top of the tree."

As a final test, Camp Winnisquam is adjacent to a huge apple orchard.

In the second form, Lake **Winnisquam** also has been passed along as an Abnaki or Pennacook term. In this, originally *winne-* means "hereabouts, or the neighborhood around here," while *mskuamagw* refers to "red fish," or salmon. Thus, a reasonable translation of *winne-mskuamagw* would be, "around here, there are salmon."

In like manner, other terms are confusing until the histories as well as the etymologies are considered. **Squam**, in Essex County, Mass., is often confused with **Squam** Head, on Nantucket. **Squam** was originally **Wanashquompskut**, from *wanasq*, "top, summit," plus *-ompsk*, "rocks," plus *-ut*, "thither." Taken together, these yield, "at the summit of the rock," and so it is, geographically. In course of time, this has been eroded to **Squam**, or **Squom**. But the Nantucket term derives from *mi shquam manock*, "red fish," or salmon. It, too, has lost syllables over the centuries, leaving only the middle form to contemporary usage.

And, in closing, another example of lost-syllable confusion is **Tomheganompskut**, which is due course has become **Higganum**. Without knowledge of the historical changes which some of these terms have undergone, any accurate translation of a term like **Higganum** would obviously be impossible.

A WORD ABOUT MAPS

In preparing this work some 500 maps were consulted, chiefly topographic quadrangles of New England dating from the early 1900's. These were painstakingly examined; every Indian-appearing name was noted, then checked against standard vocabularies. Following this, maps of New France, Nova Scotia, New England and adjacent territories were checked with equal care. The more important such sources are listed below.

In northern New England, early French and English map makers wrote Mohawk, Huron, Abnaki, Pennacook, Malecite and Micmac names as they heard them; since there was no written aboriginal language, spellings could not be checked. Likewise, pioneer Dutch, English and German scribes entered names as their European ears registered the two-score dialects used in Massachusetts, Rhode Island and Connecticut. It is not surprising, therefore, to note that **Winnepesaukee** is found in at least one hundred spellings; that **Memphremagog** (erstwhile **Mehemsabegek**, long *j*, or *s* miscopied) is now spelled with a *ph* where none such appears on early maps; or that **Montaup** became Mount Hope.

Changes within languages can be traced through map entries, as **Wambighe** to **Umbagog**; **Ouramon** into **Olamon**; etc., as Old Abnaki gradually became Modern Abnaki. Maps also contribute to errors; the continuous process of copying and re-copying of various editions of maps which were published throughout the early days left a synonymy which will probably never be entirely unravelled.

Some old maps yielded many names, as Father Joseph Aubéry's fine 1715 chart of New France and New England. Others provided fewer names, and some none at all. The same observation applies to most charts up to about 1750, by which time many Indian names had been replaced by English. For example, **Naumkeag**, Massachusetts, had been renamed Salem; and **Sicaog**, Connecticut, had become Hartford. Very few "new" Indian names were added to New England places after 1750; most of these were imports or transplants due to the influence of Longfellow's *Hiawatha* or the return of soldiers to New England after the Civil War.

Occasionally old Indian names were preserved on relatively recent documents, as on the Dorchester map of Lower Canada (1794). On this map alone appears **Misquiquaungameck**, the Abnaki name for the Clyde River.

The following is a summary of only the more important maps which contributed in a large measure to this study. In addition to these major topographical charts, extensive use was made of a tremendous variety of maps in books, pamphlets and other scattered publications.

- 1542? AUTHOR UNKNOWN. *Harleian Mappemonde* (Plate VIII). Colored manuscript "Map of the New World." Unsigned, undated; from the original in the British Museum.

INDIAN PLACE NAMES OF NEW ENGLAND

— A —

Abacotnetic Bog, Somerset County, Me. *Abnaki*, "stream opening out from between mountains."

Abagadusset Stream and Point, Sagadahoc County, Me. *Micmac*, "little parallel river."

Abagamok West Lake, Hancock County, Me. *Micmac*, "lake parallel to" Nicatous Lake.

Abahguit the sound between Lubec, Washington County, Me., and Campobello Island, New Brunswick. At one time the island was the summer home of Franklin D. Roosevelt. *Malecite*, "something parallel to the main land."

Abahos Stream, Penobscot County, Me. *Micmac*, "runs parallel to" [another river].

Abalajackomegus Stream, Piscataquis County, Me. *Abnaki*, "bare, no trees."

Abaquage Pond, Windham County, Conn. *Nipmuck*, "place where rushes grow."

Abaquakea Essex County, Mass. *Natick*, "land of flags or rushes."

Abbouset River, Suffolk County, Mass. *Natick*, "place of going up stream" (?)

Abenaki Lake and Mountain, Coös County, N. H. *Abnaki*, "dawn land" or "easterners." Other spellings include *Wabanakee*, *Waubanakie*, *Wapanakkee*, *Abnaki*, etc.

Aberjona River, Norfolk County, Mass. *Natick*, "junction or confluence."

Abessah Bar Harbor, Hancock County, Me. *Malecite*, "clam bake place."

Abnaki Indians, one of the major northeastern Algonquian tribes. Their name, more properly Wabanaki, means "dawn people," or "easterners." They lived in western Maine, Carroll County, N. H., and north into New Brunswick. Today their des-

cendants mostly live at Odanak (St. Francis), Québec. Also spelled *Abenaki*, *Abeniqui*, *Waubanakee*, etc.

Abocadneticook now Baker River, Grafton County, N. H. *Abnaki*, "the place of the stream opening out of the mountains." Some translate this "stream narrowed by mountains;" the interpretation seems to depend on which way one is looking.

Abocadneticook the West Branch of Penobscot River, Piscataquis County, Me. *Abnaki*, see above.

Abocadneticook Pond, Somerset County, Me. *Abnaki*, see above.

Abojedgewak a stream connecting North and South Twin Lakes, Piscataquis County, Me. *Abnaki*, "two currents flow, one on each side" [of an island].

Abol Deadwater Pond and Trail, Piscataquis County, Me. *Abnaki*, "bare, devoid of trees."

Aboljackarmegas Stream, Piscataquis County, Me. *Abnaki*, "[banks of] swift stream, smooth, bare of trees."

Abonegog the Black River, Lincoln County, Me. *Abnaki*, "opening wide" as it gets nearer the ocean.

Abonesig River, Lincoln County, Me. Modern *Abnaki*, "small resting place"(?) or "small baking place."(?) Translation depends upon whether the original was derived from *abon*, "oven," or "bread," or from *abi*, "sit down; rest."

Abraquidasset Point, Washington County, Me. See **Abagadusset**.

Abrigada Hill, New Haven County, Conn. *Quinnipiac*, "hiding-place or shelter." Variant spelling, **Abrigador**.

Absalona Hill, Providence County, R. I. Probably not Indian, but perhaps named for an Indian named Absalom.(?)

Absalonomiscut Providence County, R. I. *Narragansett*, "place of the fish trap" or "where fish are caught in a weir."

Acadia Village, Aroostook County, Me. *Micmac*, "the earth," "the place," or "the land."

Accomack Plymouth County, Mass. *Wampanoag*, "on the other side."

Accomonticus Suffolk County, Mass. *Natick*, "beyond the little river." See **Agamenticus**.

Acemy Nantucket County, Mass. *Wampanoag*, "dry land," [*i. e.*, "ashore"].

Achagomiconset Washington County, R. I. *Narragansett*, "where there are green meadows," as for pasture. Also **Ashagomiconset**.

Achagomiconset Meadow, New London County, Conn. *Eastern Niantic*, "place of green pastures or green meadows."

Achetaqupag see **Maruscopag**.

Achetonsick see **Assapumsic**.

Acoaxet Bristol County, Mass. *Narragansett*, "at the fishing promontory," or "at the place of pines" (?); or "place of small fields." (?)

Acocisco see **Auco Cisco**.

Acokesit River. See **Acoaxet**.

Acomekes or **Acomeques** New London County, Conn. *Mohegan*, "land across," or "place on other side." See **Accomack**.

Acomes Falls, Androscoggin County, Me. *Abnaki*, "high."

Acontaug Brook. See **Aguntaug** and **Aquntaug**.

Acoomemeck Worcester County, Mass. *Nipmuck*, "at the place across" (?). An ancient village site.

Acoont River, Plymouth County, Mass. *Wampanoag*, "place across" or "place on the other side."

Acquasimink Fairfield County, Conn. *Mahican*, "abode of the woodchuck."

Acquebapaug Pond, New London County, Conn. *Eastern Niantic*, "before the pond" or "alongside the pond." Also **Acquibapaug**.

Acquebatuck Hill, Windham County, Conn. *Nipmuck*, "at the end of the river."

Acquedneseth Tract, R. I. See **Acquidnesit**.

Acquedenuck or **Acquidaneck** Windham County, Conn. *Mohegan?* *Nipmuck?* "place beyond the hill."

Acquednuck River, a branch of the Pawtuxet. Washington County, R. I. *Nipmuck?* *Mohegan?* "place beyond the hill."

Acqueet River, Plymouth County, Mass. *Wampanoag*, "boundary or ending place."

- Acquehadongonock** Point, Knox County, Me. *Abnaki*, "place where canoes are slid out of, or into, water." Probably a canoe-harbor at a fishing place.
- Acquessuc** Franklin County, Me. *Abnaki*, "place of the slender trout," the *oguassa*, (*Salvelinus oguassa*).
- Acquettink** see **Aquidneck**.

- Agamenticus** Lake, Mountain, and River, York County, Me. *Abnaki*, "a little river which lies behind an island at its mouth," or perhaps "other side of the little river." Variant, **Aggamantukoos**. See **Sasanow**.
- Agamuntaëg** Pond, Franklin County, Me. *Abnaki*, "place on the other side of the river." See **Agamenticus**.

Agawam Essex County, Mass. *Pennacook*, "low land," or, "land overflowed by water;" also, "place to unload canoes."

Agawam Hampden County, Mass. (two such places); also in Plymouth County, Mass. *Nipmuck*, "low land," or "overflowed by water;" also "place to unload canoes."

Agenyateonnia Colchester Point, Chittenden County, Vt. *Mohawk*, "point at the end."

Aggamoggin Strait, Maine. See **Eggemoggin**.

Aghenibekki River. See **Kennebec**.

Agicomook Stony Creek, New Haven County, Conn. *Quinnipiac*, "sheltered haven." Found also as **Agiocomock**, **Ajicomick**, etc.

Agiochook is Mount Washington, Coös County, N. H. *Abnaki*, "at the place of the concealed one." Variant, **Agiocochook**.

Agiscohos see **Aziscoös**.

Agency a mythical (?) Indian place near the mouth of Penobscot River, Waldo County, Me. *Huron*, "an island." Anciently **Aguncia**, q. v.

Aguadocta just west of Saco, York County, Me., on 1690 map. *Abnaki*, "at the end of the portage, where we take canoes out of the water."

Aguahadongonock several localities along the Maine Coast in York and Cumberland Counties. *Abnaki*, "the place where I draw (canoe) out of the water," as at the end of a portage.

Aguahassideck Fort Point, Waldo County, Me. *Abnaki*, "landing place for canoes." This term was also applied to places where otters slid into the water; "otter-slides."

Aguahega Damariscove Island, Waldo County, Me. *Abnaki*, "a landing place" for canoes.

Aguncia Waldo County, Me. Probably *Huron*, "an island." See **Agency**.

Aguntaug Brook, Washington County, R. I. *Narragansett*, "under a tree," or "big tree place."

Aguspemokick Island, Gould's Island, Newport County, R. I. *Narragansett*, "short narrow straits." See **Aquopimokuk**.

Agutteback Pond, Worcester County, Mass. *Natick*, "kettle pond." This was originally *aucuck pang* or *ohkeek pog*; it is near a soapstone (steatite) deposit where Indians made kettles,

dishes, ladles, etc. Another source translates this as "herb pond," from *ohkeit paug*.

Ahampatunshauge Pond, Worcester County, Mass. *Nipmuck*, "beyond the round pond (where rushes grow?)" or "place of small pointed stakes," (some sort of garden fence?)

Ahapaconsett Nantucket County, Mass. *Wampanoag*, "flags or rushes" to make mats for covering.

Ahbasak and **Ahbaysauk** Bar Harbor, Hancock County, Me. *Abnaki*, "where we bake and dry soft shell clams" (steamer clams, *Mya arenaria*).

Ahionwatha variant of **Hiawatha**, q. v.

Ahmelagognetecook Cumberland County, Me. *Abnaki*, "at the place of drying and curing" [fish and game].

Ahquahunwansuh Plymouth County, Mass. *Wampanoag*, "here the flat land ends," or "the plain ends here."

Akweek a hill near Eddington, Penobscot County, Me. *Abnaki*, "at the steep place."

Alamascook See **Alamoosak**, **Allamoosook**.

Alamoosak Lake, Hancock County, Me. Garbled *Malecite*, "at the fish-spawning place."

Alexander see **Wamsutta**.

Algonkine Point, Grand Isle County, Vt. See below.

Algonquin Mountain, Washington County, Vt. If *Micmac*, "at the place of spearing fish [as at the bow of a canoe]." If *Algonquin*, "people of the other shore."

Algonquin State Forest, Litchfield County, Conn. See above.

Alipconk Village, Fairfield County, Conn. *Paugussett*, [a Wap-pinger sub-group] "over-flowed place."

Alkarmus Plymouth County, Mass. *Wampanoag*, "insect which causes oak-galls."

Allagash Lake, falls, and stream, Piscataquis County, Me. *Abnaki*, "bark cabin," or "birch-bark shelter."

Allagash Falls, lake, river and village, Aroostook County, Me. See above.

Allagask wigamook Churchill Lake and Mountain, Piscataquis County, Me. *Abnaki*, "at the bark cabin lake."

Allahtwkikamoksis Pond, Aroostook County, Me. *Abnaki*, "at the little field where much game has been killed."

Allamoosook Pond, Hancock County, Me. *Abnaki*, "place of the small dog." See **Alum**.

Almouchicoisen This name, which appears on several old maps, refers to the Indians of northeastern Massachusetts, southeastern New Hampshire and adjacent Maine. *Abnaki*, "little dog people."

Alnambi-i-menahan Old Town, Penobscot County, Me. *Abnaki*, "our own [Indian] people's island." cf. Laurent (1884): *alnoba*, "Indian;" *pôgui alnobak*, "full-blooded Indians."

Alnambi kwaysah wayk Indian Point, Hancock County, Me. *Micmac*? "Indian point," or "our own people's point."

Alnobaganock Penobscot County, Me. *Abnaki*, "place of our [Indian] ceremonial dance." Refers to the *Alnobagan* ceremonial dance performed at weddings. There were probably many such "dancing places."

Alskachewack the Black River, Windsor County, Vt. *Abnaki*, "at the great pile of shells." But see **Kaskatchawak**.

- Alum Lake**, Providence County, R. I. *Nipmuck*, "a dog." Apparently the Pequot people called this same pond **A'wumps**, q. v. Also **Allum**, **Wallum**, etc.
- Alum Pond**. Several ponds in Worcester County, Mass. See above.
- Amaganset** Suffolk County, Mass. *Natick*, "at the well," or perhaps "at the (council) place where we smoke." Smoking was commonly referred to as "drinking weak tobacco." Sometimes translated as "at the fishing place," or "at the point."
- Amalingan** the regions occupied by the Mahican in western New England, Maine, and in eastern New York. This name is apparently a corruption of **Mahican**, q. v.
- Amanuseag** River, same as **Ammonoosuc**.
- Amaseconti** Several places of this name in Maine. *Abnaki*, "plenty of fish."
- Amataconet** Providence County, R. I. *Narragansett*, "observation place,"[?] or "meeting place." [?]
- Ambajack mockamas** Falls, Piscataquis County, Me. *Abnaki*, "slantwise of the regular route."
- Ambajejus** Lake, Piscataquis County, Me. *Abnaki*, "two currents, one on either side [of an island]" See **Abojedgewak**.
- Ambajemackomas** Pond, Piscataquis County, Me. *Abnaki*, "a little pond crosswise" of the usual route.
- Ameriscoggin** Several places of this name in Maine. Probably Old *Abnaki*, "catching and curing fish." See **Androscoggin**.
- Amessagunticook** Farmington Falls, Franklin County, Me. *Abnaki*, "at the place abounding in alewives," or "plenty of migratory fish here."
- Amessecantee** now Farmington Falls, Franklin County, Me. *Mahican*, "plenty of fish." It is believed that Amessecantee was an Indian village established by Mahican refugees from New York and New England around 1697.
- Amgopilasig** Ponds, Penobscot County, Me. *Micmac*, "little lakes tied together by brooks."
- Amiciskeag** Kittery Point, York County, Me. *Abnaki*, "fishing at the point."
- Amilcungatiquoke** Cumberland County, Me. *Abnaki*, "at the river where fish are caught and cured."

Amilesk Big Lake, Washington County, Me. *Abnaki*, "where provisions are cured and stored."

Amilkan Lisbon Falls, Androscoggin County, Me. *Abnaki*, "a fish drying place."

Amiskeag same as **Amoskeag**.

Amitgon pontook Lewiston Falls, Androscoggin County, Me. *Abnaki*, "at the river-falls where fish are cured."

Ammacongan Falls, St. George River, Waldo County, Me. *Abnaki*, "fish drying and curing" station. Variant: **Ammon-congin**.

Ammadamast the Cold Stream, Penobscot County, Me. *Abnaki*, "fish, or alewives, here."

Ammanatocksuck Hill, Hartford County, Conn. *Wangunk* (a Wappinger sub-division), "lookout place on a hill near a brook outlet." See **Manatuck**.

Ammecungan Falls, Presumpscot River, Cumberland County, Me. *Abnaki*, "where [migratory] fish are caught and cured."

Ammeriscoggin River; same as **Androscoggin**.

Ammesokantis Lincoln County, Me. *Abnaki*, "abundance of alewives."

Ammocangen Middlesex County, Mass. *Natick*, "a fish-curing place."

Ammonoosuc River (Lower), Grafton County, N. H. *Abnaki*, "small narrow fishing place." Sometimes spelled **Omanosek**.

- Mouscochuck** Creek; see **Musquechuge**.
- Moxisset** Essex County, Mass. *Natick*, "place of small grasses"? or "small shoes"?
- Moz Mushkeg** Grafton County, N. H. *Abnaki*, "moose meadow."
- Mozias** a locality in Essex County, Vt. May be *Abnaki*, "moose meat," or perhaps from the name of a White man named Mozier or Mosier.
- Mozodepowadso** Mount Mansfield, Chittenden County, Vt. *Abnaki*, "moose head mountain" from its fancied resemblance to the horned animal's head.
- Mozodup Nebes** Moosehead Lake, Piscataquis County, Me. *Abnaki*, literally, "moosehead lake."
- M'skootuk** Lake, Washington County, Me. *Abnaki*, "trout place." (But this root gives trouble; the translation might be "at a point of land," or "fireplace.") See **M'skutook** and **Schoodic**.
- M'skutook** an abbreviation for Pemskudek, Marsh's Farm, Old Town Island, Penobscot County, Me. *Abnaki*, "extended burned-over place," near the river. See **M'skootuk**.
- M'squamagwesebo** Hale Brook, Penobscot County, Me. *Abnaki*, "salmon river" or "salmon brook."

- M'squam Chumaki** Belknap County, N. H. *Abnaki*, "salmon spawning place."
- M'squam Nebis** now Squam Lake, Grafton County, N. H. *Abnaki*, "salmon lake." This title noted on Aubéry's map of 1715.
- M'squamscook** now Exeter, Rockingham County, N. H. *Abnaki*, "at the abode of salmon."
- M'teoulin, Madeluno, and Madewahun**, (modern *Abnaki* and *Malecite*); **Manrigwa** in *Old Abnaki*; and **Magermette** or **Majalmit** in Modern *Abnaki* all mean "one who drums," that is, "soothsayer," "witch or sorcerer," etc. These terms figured in unofficial or local names, most of which were suppressed after 1630 by White religious authorities. Some of these have been re-located or discovered by linguistic students, e. g., **Kinkajou**.
- Muchquachema** Swamp, Plymouth County, Mass. *Wampanoag*, "red fox."
- Muckcheese** Middlesex County, Conn. *Natick*? "small animal," such as a kit beaver, or bear cub.

APPENDIX

The following section presents a glossary of the most common root words found incorporated into various Algonquian place names. In the first column are the English equivalents, arranged alphabetically, giving as closely as is possible the sense conveyed by the Algonquian term. In the second column are those place names found in Northern New England, (NNE), which incorporate these roots, together with variant forms.

The third column, in *italics*, lists the root itself which has been incorporated into the preceding place name. Literal translations are included to more clearly explain the usage.

In the fourth column are those place names more commonly found in Southern New England dialects, (SNE), and the final column again gives the root term found in the preceding, as well as literal interpretations.

It is the hope of the compiler that this will enable the interested reader to make further analyses of Algonquian geographical terms, and also that it will more clearly reveal the methods whereby the Indian joined various phonemes to form such place names.
